Raidel Martínez Santos

SOFTWARE ENGINEER — BACKEND & AI AUTOMATION

Remote · open to relocation
yoshilol0526@gmail.com • github.com/YoshiLoL0526 • linkedin.com/in/raidel-martínez-santos

STACK

Languages

Python · TypeScript · JavaScript · SQL · Rust · basic · Lua

Backend

FastAPI · Flask · NestJS · Fastify · SQLAlchemy · Prisma · Alembic · Pydantic · REST · WebSocket · SSE · JWT / RBAC

Frontend

React · Next.js · React Native · Vite · Tailwind CSS · Zustand · Radix UI · Tiptap · PixiJS

AI & Automation

LLM agents · MCP · RAG · OpenAI · Anthropic · Ollama · ChromaDB · vector search · n8n

Agentic Engineering

Claude Code · Codex · OpenCode · Agent orchestration · Subagents · MCP servers · Agent SDK

Data

PostgreSQL · SQLite · ChromaDB · Redis

Infra & Tooling

Docker · Nginx · GitHub Actions · Linux · PyInstaller / PyWebView · pytest · Vitest · Playwright

PROFILE

Software engineer with 4+ years building full-stack products and AI-automation systems. I work mainly in Python (FastAPI) and TypeScript (NestJS, Next.js, React), with focused experience in LLM agents, the Model Context Protocol and n8n workflow automation. I also use agentic coding tools —Claude Code, Codex and OpenCode— to orchestrate subagents, review code and take tasks from design to implementation. Comfortable across the whole delivery cycle —API and data-model design, real-time systems, multi-tenant infrastructure and desktop packaging— and used to owning projects from the first commit to production.

EXPERIENCE

Software Engineer — Freelance / Self-employed

Aug 2022 — Present

Remote

- Deliver full-stack web apps and AI-automation systems end to end for clients: architecture, implementation, deployment and maintenance.
- **InvokeIA (current engagement):** building a clinical management and AI automation platform for clinics.
- The product covers scheduling, clinical records, sales and invoicing, automation workflows and patient communications.
- It also includes reporting, AI agents and a DICOM viewer for X-rays and CT scans.
- Main stack: **Next.js / React, Python / FastAPI, n8n, PostgreSQL and Docker**, with WhatsApp Business API integrations.
- Use agentic coding tools (Claude Code, Codex and OpenCode) to orchestrate agents, review code and automate development tasks.

Software Developer — Desoft

Sep 2024 — Jan 2025

Santiago de Cuba, Cuba

- Backend developer on enterprise software projects: relational and NoSQL data modeling and business-process automation.
- Contributed to API design, database schemas and internal tooling within an agile team.

EDUCATION

B.Sc. in Computer Engineering
Universidad de Oriente
Santiago de Cuba, Cuba
2021 — 2024

LANGUAGES

Spanish	Native
English	B2
Portuguese	A2

SELECTED PROJECTS

Team Flow
`NestJS · Prisma · PostgreSQL · Redis`

Full-stack team-collaboration platform: per-team dynamic RBAC, TOTP two-factor auth, an AES-256-GCM credential vault with a full audit log, real-time chat and notifications over Socket.IO, and Kanban / list / calendar / timeline task views.

agent-sdk
`Python · asyncio · Pydantic`

Async-first SDK for building LLM agents. Swappable providers (Anthropic / OpenAI / Ollama), pluggable memory (SQLite FTS5, files, ChromaDB), three runtime modes (conversational, ReAct, autonomous), an event + plugin system, and multi-agent orchestration via sub-agent tools.

Agents Team
`Python · Markdown · YAML`

CLI that keeps one canonical definition of AI agents and installs it into Codex, Claude Code and OpenCode, with metadata and permission validation, native rendering, global or per-project installation and backups.

Mnemosyne
`ChromaDB · MCP · Typer`

Long-term vector-memory system for AI agents and developers: local embeddings, multi-project semantic search, a Rich/Typer CLI and an MCP server that gives editor agents persistent project memory.

`github.com/YoshiLoL0526/mnemosyne`

mcp-toolkit
`FastMCP · Playwright`

General-purpose Model Context Protocol server: web search and scraping, generic HTTP, sandboxed Python/JS execution with timeouts, persistent SQLite memory and timezone/date utilities.

`github.com/YoshiLoL0526/mcp-toolkit`

Paris System
`FastAPI · SQLAlchemy · React · PyWebView`

Desktop management app for a formalwear-rental store. Modular FastAPI backend (SQLAlchemy, Alembic, JWT, RBAC, audit trail) with a React/Vite frontend, shipped as a single Windows executable via PyInstaller + PyWebView.

Video Editor
`React 18 · TypeScript · ffmpeg.wasm`

Local-first video editor for web and desktop (MIT). Client-side processing with ffmpeg.wasm / WebCodecs, a .vproj data model with migrations, undo/redo history, File System Access API persistence and a platform-adapter layer ready for Tauri.

More at **github.com/YoshiLoL0526** — Local Share (mDNS + TLS file transfer), Lily Flans & Home Budget (React Native, multi-currency), Toolkit (local web utilities).
